

Using a Class Code to sign in

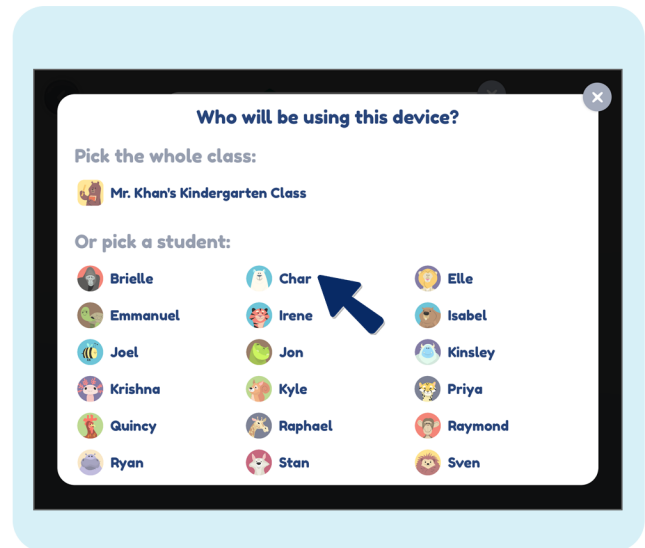

Step 1. Download the free Khan Academy Kids app onto a mobile device. It is available on most tablets, smartphones, and Chromebooks. If you already have the app downloaded, please delete and reinstall.

Step 2. Tap “At School” and then select “Student.”

Step 3. Type or scan the teacher's Class Code.

Step 4. It's very important to **select your child's name from this screen**. This will “lock” the device to their profile and save their login for the next time they open the app.
